

Campus CMS Users Meeting

July 22, 2014

- Monthly Users' Meeting was hosted on-line via ReadyTalk.

STATE OF THE SERVICE:

- The Web CMS Service will be moving to IET and become a centrally managed IT service reporting to Shawn DeArmond in IET's Application Development unit.
- Jessica and Christian will continue to provide administrative, technical and service support, and the transition should be relatively seamless.
- The team will be relocated off-campus to 3820 Chiles Road at the PSL building, but available to come to campus.
- The Web CMS Service will continue to operate as-is and **no changes** are planned.

New develop releases:

- Person page
 - Operates like the Person block, but has the block already embedded in the page for convenience
 - Unlike the block, it cannot be used in multiple locations
 - Available from the Content Library: General Library/People and Persons section
- People Index page
 - Offers the same configuration settings as the People Index block, but is already embedded in the page
 - Can output the indexed display immediately inside of the CMS without the need to publish to a server environment
 - Can only be used inside of the /people folder
 - Unlike the block, it cannot be used in multiple locations
 - Available from the Content Library: General Library/People and Persons section

Upcoming projects:

- Catalog Services block
- Folder configuration
- Add This social media option
- Site Assets Menu update
- RSS Feed block update
- WYSIWYG update
- /person subfolder categorization update
- For details see our [Development Roadmap](#)
