

# Campus CMS Users Meeting

## August 19, 2014

- Monthly Users' Meeting was hosted on-line via ReadyTalk.
- A Webinar was made of the event and is now [hosted on the LMS system](#) for your convenience

### New development releases:

- RSS Feed block
  - Can now embed a link in the title which turns the entire headline and its block into a clickable button
  - Display options now include a paragraph setting that outputs the story feed in amounts of 250, 500, and 1000 characters each
  - Inclusion of a new theme switcher for more built-in color choices for the header's background color
- Merge page template demo
  - Showed a very early version of the next iteration of the CMS page template
  - It will merge the offerings of the Flex and Standard page into one offering
  - Smart navigation will be offered in the form of a block that can be attach just like other blocks
  - Will offer pre-configured page layouts to make consistent page layouts easier to achieve
  - Will include more configuration opens:
    - More columns per row
    - CSS on rows and columns
- Site assets
  - We'll be re-organizing and expanding the Site assets available in each site
  - The New | Site assets menu will be broken into four categories of Blocks, Pages, Folders and Links, and Managers. The last is restricted and only visible to managers
  - Will still have access to the block offerings in the Content Library, but this will bring those options right into the sites for greater convenience
- Help Request Tips
  - Make your service requests more efficient by including the following information:
    - The name of the site in the CMS where you experienced the problem
    - An explanation of what you were doing or trying to accomplish when the problem occurred
    - The text from any error messages you received
    - Screen captures if you think some visual clues might help explain the problem
    - The URL of the page(s) if the issue is only showing online
- Catalog block
  - Requesting input from users as to how they might want to list anything that isn't "people"

- Will work on a similar structure as the people index pages and person pages and the indexing folder for custom categorization
- No delivery date available at this time
